

XM radio is giving what the people want. The NAB has not done anything. I can finally get traffic report on road conditions in New York City on all the major roadways. All the other station's only report on the crossings to New Jersey. I never know whats going on the Belt Parkway.

XM is like satalite tv you pay for the service. The NAB has no jurisdiction on this. It is a subscription based service which they have no right to tell XM what they can transmit.
